

STATIM GI™

Technology That Insures Confidence

A Unified Solution Powering Every
Line of Insurance

Powering a Smarter Insurance Ecosystem

STATIM GI™ equips insurers with the intelligence, flexibility, and speed needed for every aspect of insurance operations.

Built with a modular, low-code, and database-agnostic architecture, STATIM GI™ enables seamless integration, scalability, and faster go-to-market capabilities. The entire insurance lifecycle, from policy configuration to claims settlement, is made easy through the AI-driven automation, and a composable architecture that adapts effortlessly to change.

The One-Stop Product Studio

STATIM GI's Product Studio empowers insurers to design, launch, and manage innovative insurance products with speed and precision.

Made for Global Insurers

Multi-company, multi-currency, multi-lingual capabilities that are tailored for global operations and cross-border market needs

Multi-line Flexibility

Configure traditional, takaful, and health insurance products across core, B2B, B2C, and mobility lines

Core Functional Modules for Seamless Operations

Product Configurator

Create and manage products effortlessly with an intuitive, low-code configurator to match any market demands

Policy Management

From quote creation, endorsement management, fleet management, to renewals, manage the entire policy lifecycle seamlessly

Rating Engine

Define pricing, loadings, and discounts for a multitude of product variants, driven by business parameters and real-time insights

Rules Engine

Empower your teams with configurable rule sets that adapt to varying business practices

Claims Management

Accelerate claims with automation and fraud detection with FNOL (First Notice of Loss), STP (Straight Through Processing), and OCR-based document handling

Reinsurance Management

Gain better control of risk and recoveries with proportional, non-proportional, and facultative arrangements for flexible coverage

Communication Hub:

Personalize every Policy Interaction

With its integrated Communication Hub, the Product Studio empowers insurers to craft custom templates for policy schedules, letters, and annexures, ensuring every communication is consistent, personalized, and seamlessly delivered across multiple channels for faster engagement and better customer experience.
